

## IBM PREREQUISITES

TEAM ID	PNT2022TMID46485
PROJECT NAME	Fertilizers Recommendation System for Disease Prediction

### PREREQUISITES:

To complete this project we should have the following software and packages

#### **ANACODA NAVIGATOR :**

Anaconda Navigator is a free and open-source distribution of the Python and R programming languages for data science and machine learning-related applications. It can be installed on Windows, Linux, and mac OS. Conda is an open-source, cross-platform, package management system. Anaconda comes with so very nice tools like JupyterLab , Jupyter Notebook, QtConsole, Spyder, Glueviz, Orange, R studio, Visual Studio Code. For this project, we will be using Jupiter notebook and spyder.

#### **TENSOR FLOW:**

Tensor Flow is an end-to-end open-source platform for machine learning. It has a comprehensive, flexible ecosystem of tools, libraries, and community resources that lets researchers push the state-of-the-art in ML and developers can easily build and deploy ML powered applications.

#### **KERAS:**

Keras leverages various optimization techniques to make high level neural network API easier and more performant. It supports the following features:

- \* Consistent, simple and extensible API.
- \* Minimal structure - easy to achieve the result without any frills.
- \* It supports multiple platforms and backends.
- \* It is user-friendly framework that runs on both CPU and GPU.
- \* Highly scalability of computation.

#### **FLASK:**

Web framework used for building Web applications.
